

## What data can I get from the videos?

All data you can need for your traffic survey!

With SWISSTRAFFIC.ai, you can measure a wide range of **advanced traffic parameters** thanks to the **trajectory-based** approach analysing: **current speed, acceleration, deceleration**, classification up to **10 categories**, **safety analysis** (measuring time to collision, heavy braking or risky situations), configurable **gate counting** including O/D matrix, travel and occupancy times, headways, gap time & time to follow analysis, **capacity estimations**, various **export functions** and **statistics** and many more features...

And all with **98% - 100% accuracy** with **every single millisecond** in the video for each tracked object thanks to a professional desktop application for traffic analysis SWISSTRAFFIC.ai Viewer!

Look at the pictures below to see a few outputs from the free analytic tools available in the Viewer and **try it on your own video for free**.
