

How long does it take to obtain traffic data from my video?

You get the results before you finish your coffee!

The video begins **processing immediately** after you upload it to **our platform**. Within a few minutes you will receive a five-minutes sample, which is **always free** and based on it you can decide whether you want to perform **a full analysis**.

We use highly sophisticated algorithms with high computational complexity to ensure **98% - 100% accuracy** of your data in the shortest time. This is possible mainly thanks to our **fully automated** parallel video processing on the cloud.

SWISSTRAFFIC.ai excels in both attributes, speed and accuracy. So brew your coffee and try by yourself!
