AT SWISSTRAFFIC

we specialize in the installation and maintenance of cutting-edge mobility sensors and AI-enabled cameras for a wide range of clients. Our goal is to ensure high data quality in public spaces through top-notch services and excellent customer support – based on a robust, scalable IT infrastructure.

As a Full Stack Developer with leadership skills, you'll lead and develop our IT landscape, handling both strategic and operational responsibilities.

YOUR TASKS

- ☑ Lead a small, cross-functional IT team and coordinate with external developers, support team growth and collaboration.
- ☑ Actively develop software, focusing on our core platform, wwn the architecture and ensure quality and scalability.
- ☑ Collaborate on AI solution development with our Data Scientist, support integration and deployment of models.
- ☑ Contribute to improving existing products and building new digital solutions, aligned with the product roadmap.
- ☑ Ensure secure, stable system operations and compliance with data protection laws like GDPR.

WHAT YOU BRING

- ☑ Background in computer science or software development, ideally with IT management or business informatics.
- ☑ You have experience as a tech lead or lead developer, you're open to taking on leadership roles.
- ☑ You're a team player with strong communication skills, you enjoy working with diverse roles.
- ☑ You're skilled in frontend and backend development, mainly in Python, C++ knowledge is a plus.
- ☑ You know how to build web-based solutions using IoT sensors, from UI to data processing.
- ☑ You understand IT security and data protection, including GDPR compliance.
- ☑ You speak fluent english, german is a plus.
