

For your future mobility!

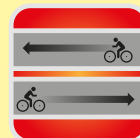

# Traffic Counting

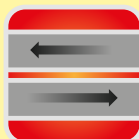

**Roundabout countings**  
including destination  
and origin traffic

**Time intervals**  
for traffic light  
improvements

**Bike countings**

**Cross-section countings**  
and speed  
measurements

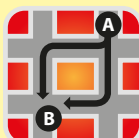

**Parking**  
duration of cars  
and bicycles

**Pedestrian counting**

**Turn o analysis**  
also at complex  
crossings

**Destination /origin  
traffic** for cars, bicycles  
and pedestrians

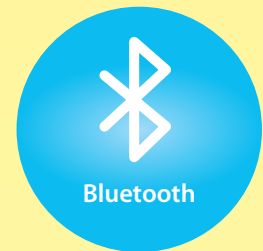

**SWISS TRAFFIC**

**We count  
accurate,  
rapid and  
convenient**

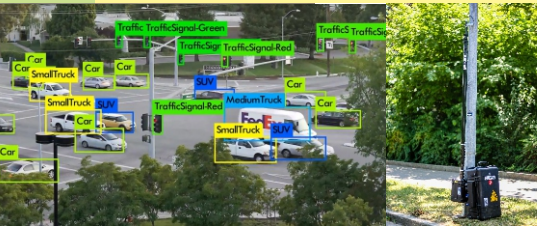

**BlueScan – WiFi & Bluetooth**

Measures the mobility behaviour of pedestrians, bicyclists and vehicles and is also compatible with public transport measurements

**Optimal product input  
thanks to latest technology**

**SwissCamera**

Day and night video data collection and automatic data analysis for up to 12 traffic types

**SwissRadar**

Ideal for 30 km/h speed limit zones and speed measurements

**SwissInfrared**

Counts pedestrians and bicyclists

**Swiss3D-Kamera**

Counts pedestrians precisely at strong frequented cross-sections

**We collect up to 12 traffic types**

**pedestrians**

**bicyclists**

**motorized  
individual traffic**  
9

**public transport**

We also count:  
scooters, vans, caravans,  
buses, trucks, bobtails

Our trac engineers from SWISS-TRAFFIC create effective and convenient measurement instruments daily with innovative technologies for traffic counting and traffic analysis
